

Project Proposal: Security Guard Management Solution

Mobile Application (Android/Play Store) & Centralized Web Admin Dashboard

PREPARED FOR

Valued Client

PROJECT SCOPE

Guard Mobile App + Admin Portal

TOTAL PROJECT INVESTMENT

₹1,10,000 INR

ESTIMATED TIMELINE

3 Months (90 Days)

1. Executive Summary

This proposal outlines the development of a comprehensive, modern, and easy-to-use **Security Workforce Management System**. The system consists of a feature-rich mobile application for Security Guards and a powerful Centralized Web Admin Dashboard for supervisors and agency owners.

By automating attendance, tracking live locations, simplifying leave requests, generating PDF salary slips, and incorporating an AI Assistant capable of communicating in Hindi and English (Hinglish), this platform eliminates manual paperwork, prevents proxy attendance, and drastically improves operational efficiency.

2. System Modules & Key Features

A. Security Guard Mobile App

- **GPS & Geo-Fenced Live Attendance:** Guards can mark Check-In and Check-Out with real-time GPS location validation to prevent location spoofing or proxy marking.
- **Smart Leave Application:** Easy leave application submission with real-time status tracking (Pending, Approved, Rejected).
- **Salary & Earnings Dashboard:** View detailed salary history, monthly payout summaries, overtime calculations, and deductions.
- **Instant Salary Slip Download:** Guards can view and download professional PDF salary slips directly on their mobile device.
- **Bilingual AI Assistant (Hindi / English / Hinglish):** AI Chatbot to assist guards with app navigation, leave rules, attendance queries, and general support in simple Hindi, English, or Hinglish.
- **Push Notifications:** Real-time alerts for shift broadcasts, leave approval updates, and salary rollouts.

B. Centralized Web Admin Dashboard

- **Live Location Tracking & Map View:** Real-time map dashboard to monitor guard positions, active duty status, and site deployments.
- **Guard & Site Management:** Create, update, and manage guard profiles, shift schedules, and client site assignments.
- **Leave Management Portal:** One-click approval/rejection workflow for guard leave applications with automated attendance adjustment.
- **Automated Payroll Engine:** Automatic calculation of salaries, attendance days, overtime hours, and net payable amounts.
- **Reports & Data Export:** Export detailed attendance, payroll, and movement logs in Excel and PDF formats for client audits.

3. Proposed Technology Stack

Component	Technologies Recommended
Mobile App	Flutter / React Native (High performance cross-platform mobile engine)
Admin Panel & Frontend	React.js / Next.js with modern responsive UI
Backend API & Server	Node.js (Express.js) / Python FastAPI (Scalable RESTful Architecture)
Database & Storage	PostgreSQL / MongoDB & Cloud Object Storage for Salary Slips
AI Chatbot Engine	OpenAI / Custom LLM API with Hindi & English System Prompts
Location Services	Google Maps API / Mapbox Integration

4. Development Timeline (3 Months / 12 Weeks)

Phase	Duration	Key Deliverables
Phase 1: Architecture & Design	Weeks 1 - 2	UI/UX wireframes, database schema design, and system architecture planning.
Phase 2: Core Development	Weeks 3 - 6	Build GPS Attendance, Guard Profiles, Admin Dashboard, and Leave Management.
Phase 3: Payroll & AI Integration	Weeks 7 - 9	Implement Payroll Engine, PDF Salary Slip Generator, and Bilingual AI Chatbot.
Phase 4: Testing & QA	Weeks 10 - 11	Field testing of live location, stress testing, bug fixing, and admin training.
Phase 5: Play Store Deployment	Week 12	Server setup on new hosting, Google Play Store app publication, and final handover.

5. Commercials & Payment Terms

Total Project Fee: ₹1,10,000 INR

Scope: Complete design, full-stack development, AI chatbot integration, Google Play Store app deployment, and admin portal setup.

Milestone Payment Breakdown

Milestone	Percentage	Amount	Trigger Condition
Milestone 1: Project Kickoff	30%	₹33,000	Advance upon contract signing and design approval.
Milestone 2: Beta Prototype	40%	₹44,000	Completion of Mobile App core UI, Attendance, & Admin Panel.
Milestone 3: Final Launch	30%	₹33,000	Successful app deployment on Google Play Store & Server Handover.

Hosting & Third-Party Infrastructure Notes

- **Dedicated Server / Hosting:** A separate new cloud hosting account (e.g., AWS / DigitalOcean / Hostinger) will be configured specifically for hosting the production database and backend APIs to ensure maximum data isolation and uptime.
- **Play Store Console:** Google Play Console developer account fee (\$25 one-time, if not already owned) and third-party API usage (e.g., Google Maps/AI API beyond free tiers) will be billed directly or managed via client cloud accounts.

6. Conclusion & Next Steps

This solution will give your security agency a competitive edge by delivering transparency, reducing admin overhead, and giving security guards an easy mobile experience. We look forward to partnering with you on this project.

To proceed:

1. Review and approve this proposal document.
2. Sign the formal development agreement and initiate Milestone 1 advance.
3. Kick off the project discovery workshop!
